TAUNTON, MASSACHUSETTS Why An Accurate Census Count Matters Hard To Count Block Groups + Federal Grant **Dollars Sensitive to Census Count** HARD TO COUNT" BLOCK GROUPS: **ALLOCATION OF FEDERAL GRANTS:** The Census Bureau counts the people every **Every year the US Government provides** 10 years. The next Census count is 2010. to states, counties and municipalities In some counties it is harder to count the grant funds that are allocated on the basis of the census count. These grants are people because some people are afraid sensitive to the census count. When there to provide information to census workers, some census workers are afraid to talk is an undercount low-wealth communities with people in their neighborhoods, and of color lose substantial federal funds some people live in hard to find locations. to which they are entitled. The Census Bureau has provided data to show In 2008 all of the counties in the State of in which areas people have been hard to count. **MASSACHUSETTS** received in federal grants This data is shown by BLOCK GROUPS within sensitive to the census count a total **NORTON** each county. The Census Bureau ranks each of \$20.4 billion. In 2008 the CITY OF TAUNTON received in Census BLOCK GROUP on a scale from 0 to 128. The Census Bureau uses 12 factors to set a score federal grants sensitive to the census for each BLOCK GROUP. The MEAN number for count a total of \$13.8 MILLION. BLOCK GROUPS in the US is 36.6. These grants are itemized on the The MEAN is the AVERAGE score for all website of the Consolidated Federal **BLOCK GROUPS** in the US. **Funds Report at:** harvester.census.gov/cffr BLOCK GROUPS that score from 37 to 59 are *RAYNHAM* above the average and are HARDER TO COUNT. The Census Bureau regards all Census BLOCK GROUPS that score from 60 to 128 as the HARDEST TO COUNT Census Block Groups with the greatest risk of an undercount. *TAUNTON* **HOW THIS MAP WORKS:** The map uses 3 color codes to identify the scoring range for each Census BLOCK GROUP. CREAM color represents the lowest range, **BERKLEY DIGHTON** below the MEAN, and EASIER TO COUNT. **GREEN** color represents the mid-range, above the MEAN, and HARDER TO COUNT. RED color is the highest range above the MEAN and represents the HARDEST TO COUNT Block Groups.
