

CLAY COUNTY, MISSISSIPPI

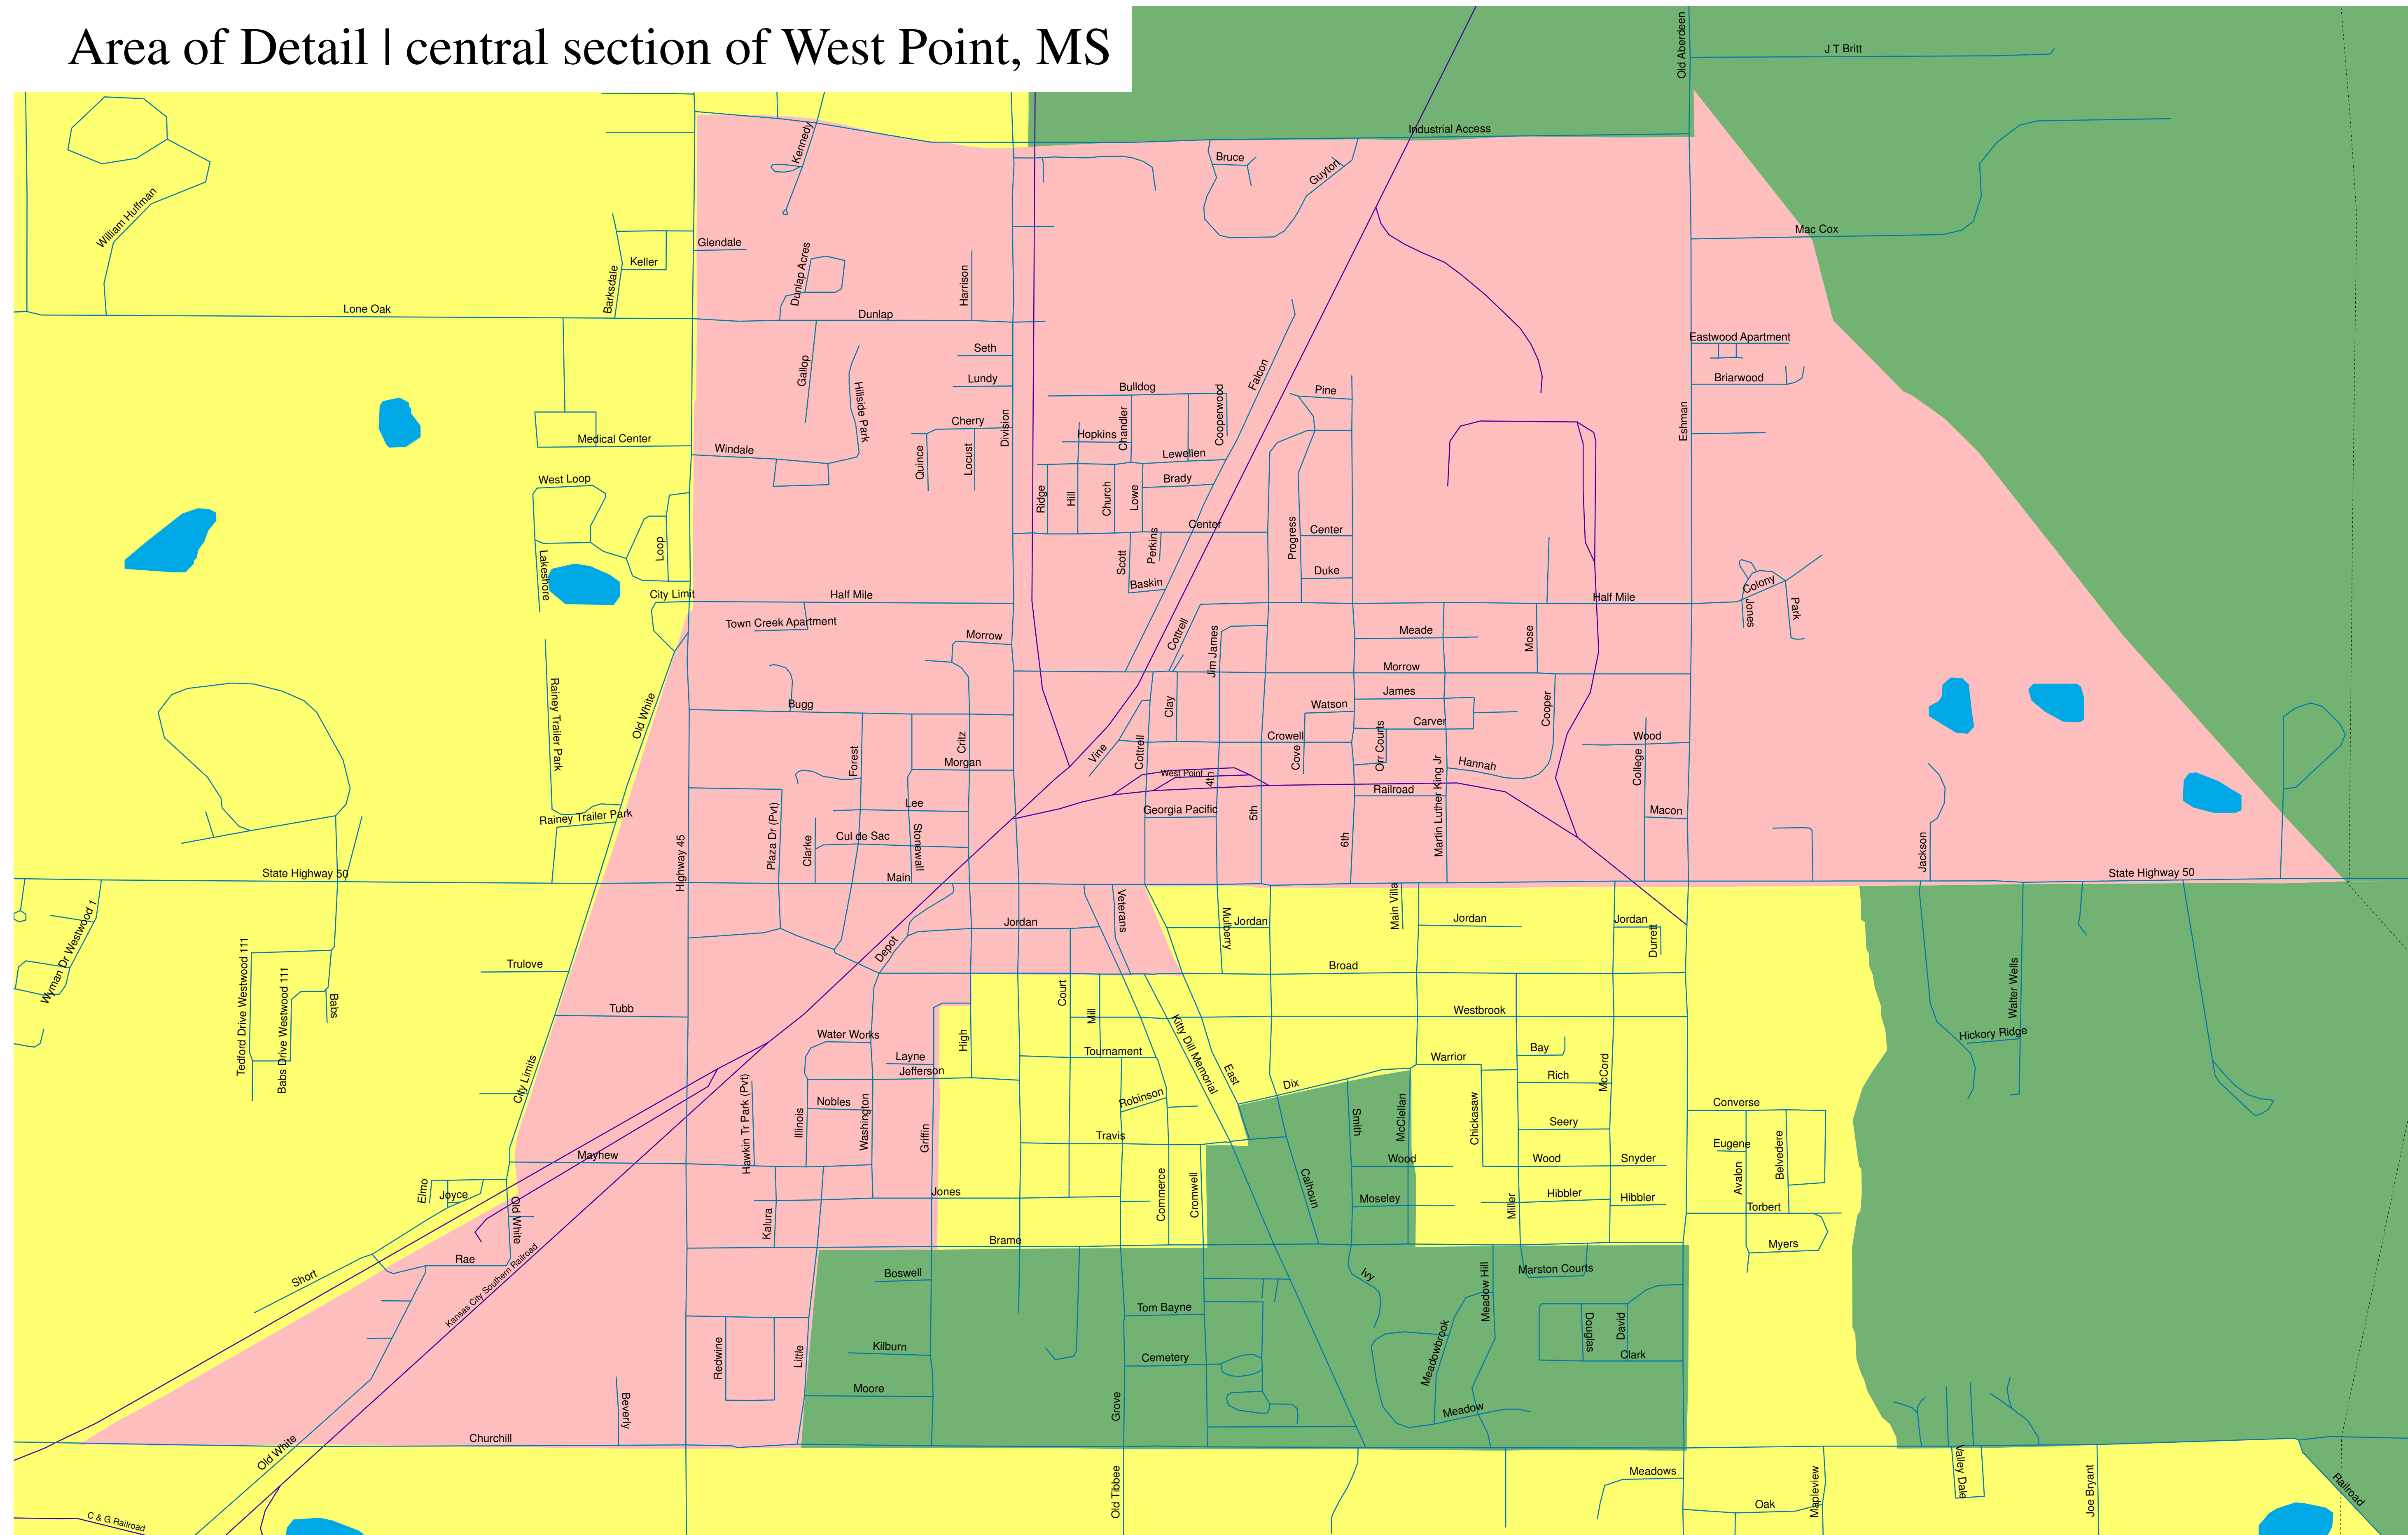

Why An Accurate Census Count Matters

Hard To Count Block Groups + Federal Grant Dollars Sensitive to Census Count

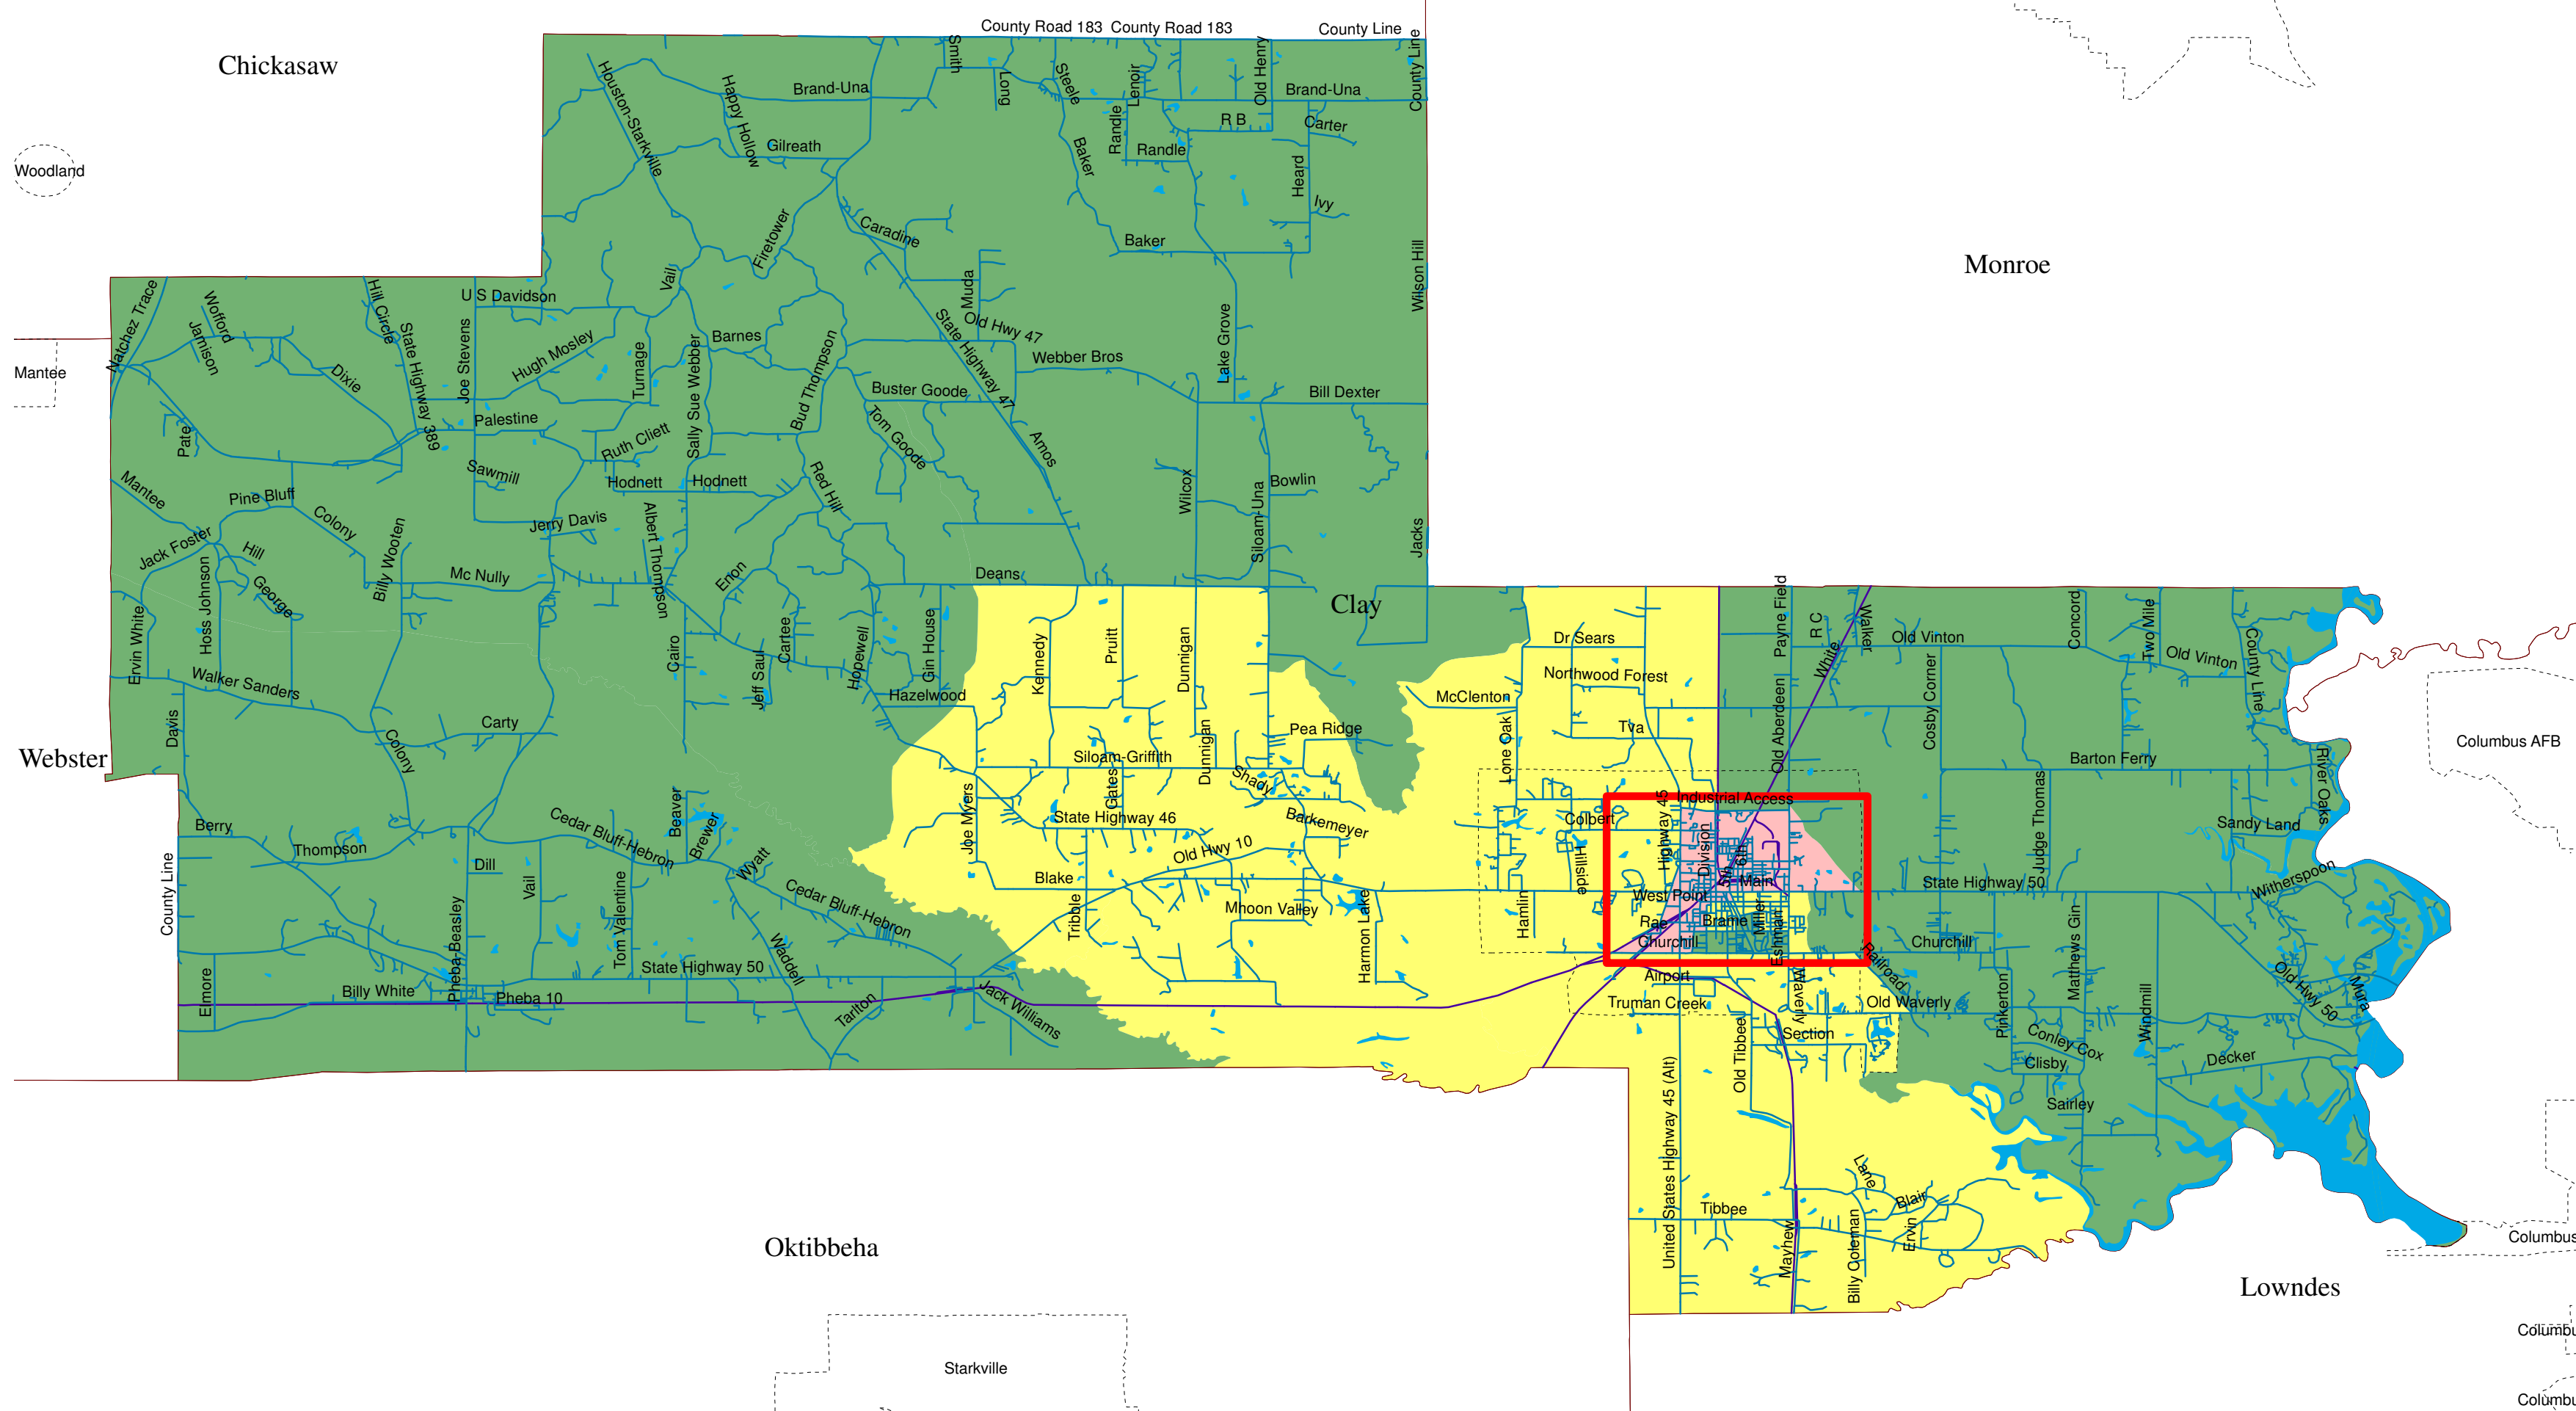

HARD TO COUNT" BLOCK GROUPS:
 The Census Bureau counts the people every 10 years. The next Census count is 2010. In some counties it is harder to count the people because some people are afraid to provide information to census workers, some census workers are afraid to talk with people in their neighborhoods, and some people live in hard to find locations. The Census Bureau has provided data to show in which areas people have been hard to count. This data is shown by **BLOCK GROUPS** within each county. The Census Bureau ranks each Census **BLOCK GROUP** on a scale from 0 to 128. The Census Bureau uses 12 factors to set a score for each **BLOCK GROUP**. The **MEAN** number for **BLOCK GROUPS** in the US is 36.6. The **MEAN** is the **AVERAGE** score for all **BLOCK GROUPS** in the US. **BLOCK GROUPS** that score from 37 to 59 are above the average and are **HARDER TO COUNT**. The Census Bureau regards all Census **BLOCK GROUPS** that score from 60 to 128 as the **HARDEST TO COUNT** Census Block Groups with the greatest risk of an undercount.

HOW THIS MAP WORKS:
 The map uses 3 color codes to identify the scoring range for each Census **BLOCK GROUP**. **CREAM** color represents the lowest range, below the **MEAN**, and **EASIER TO COUNT**. **GREEN** color represents the mid-range, above the **MEAN**, and **HARDER TO COUNT**. **RED** color is the highest range above the **MEAN** and represents the **HARDEST TO COUNT** Block Groups.

Clay County, MS with Area of Detail

Clay County Block Group Hard to Count Scores

- 0 - 36 (Below the Mean)
- 37 - 59 (Above the Mean)
- 60 - 128 (Hard to Count)

ALLOCATION OF FEDERAL GRANTS:
 Every year the US Government provides to states, counties and municipalities grant funds that are allocated on the basis of the census count. These grants are sensitive to the census count. When there is an undercount low-wealth communities of color lose substantial federal funds to which they are entitled. In 2008 all of the counties in the State of MISSISSIPPI received in federal grants sensitive to the census count a total of \$6.8 billion. In 2008 the CLAY COUNTY received in federal grants sensitive to the census count a total of \$38.5 MILLION. These grants are itemized on the website of the Consolidated Federal Funds Report at: harvester.census.gov/cffr
