Southern Echo Organizing HTC Counties, Tracts and Contacts

This map presents the location of Southern Echo's 2020 Census Organizing Hard to Count (HTC) Counties and Contacts for the state of Mississippi. The map also displays HTC census tracts corresponding to 2010 Mail Return Rates (MRR) and Low Response Scores (LRS) associated with the Census Bureau's 2019 Planning Database. Under the county label is the 2010 Mail Return Rate for the county. The thick blue lines represent congressional districts.

The census tracts with red hash marks indicate low 2010 Mail Return Rates of less than 73%. The Red dots indicate census tracts with greater than a value of 30 for its Low Response Score.
